Summary

Application Developer based in South Texas with two years of experience designing, developing, testing, and maintaining Java enterprise applications. Proficient in creating business applications using Java coupled with Db2 databases and very passionate about web development in my personal time using Angular along with Node.js and Express.

Education

Bachelor of Science in Computer Science

University of Texas Rio Grande Valley

Class of December 2015

Overall GPA: 3.23

Edinburg, TX

Experience

Application Developer

Hamer Enterprises

May 2016 – Current

McAllen, TX

- Provide ongoing development and maintenance for Java payment and billing system software sold by company.
- Responsible for redesigning and updating older projects to be responsive and mobile-friendly for a smooth user experience.
- Ensure Java projects are up to date with all requirements need to comply with strict ADA regulations.
- Document all work done on projects as well as create developer docs for any features I implement in order for future developers to easily collaborate.
- Responsible for designing and developing an administrator permissions system using Java which is now used in multiple company projects.
- Stay up to date on the latest news and releases of any technologies used in both front and back end aspects of projects in order to stay current.
- Provide technical support for customers using payment and billing systems.
- Create and maintain required SQL database tables for web applications.
